POND

AN ALMANACK

For the Year of our

LORD GOD

1695.

Being the 3d after Bissextile or Leap-year, and from the Worlds Creation at the Spring 5698 years Compleat.

Amplified with many good things, both for pleasure and profit: and fitted for the Meridian of *Saffron-Walden* in *Essex*, where the Pole is elevated 52 degrees and 6 minutes above the Horizon.

And may serve indifferently for any other place of this Kingdom.

CAMBRIDGE,

Printed by John Hayes, Printer to the Universitty, 1695.

The Vulgar Notes and moveable Feasts for this Year 1695, in both Accounts viz,

Julian or English.			*Gregorian* or Forreign.	
	5	The Golden Number	5	
	F	The Dominical Letters	B	
	25	The Epact	15	
	24	The Cycle of the Sun	24	
Febr.	3	Shrove-sunday	Febr.	13
March	24	Easter-day	April	3
May	2	Ascention-day	May	12
May	12	Whitsunday	May	22
Decemb.	1	Advent-sunday	Novemb.	27

The Suns entrance into the four Cardinal Signs.

HE enters ♈, *March* the 11th day, 17 minutes past 1 in the forenoon, and then begins our Spring Quarter.

He enters ♋, *June* the 13th, 47 minutes past noon, and then begins our Summer Quarter.

He enters ♎, *September* the 14th, 45 minutes past 4 in the afternoon, and then begins our Autumn.

He enters ♑, *December* the 13th, 37 min. past 9 in the forenoon, and then begins our Winter Quarter.

Times prohibiting Marriage.

MArriage comes in on the 13 day of January, and at Septuagesima Sunday it is out again untill Low-sunday; at which time it comes in again, and goes not out till Rogation-sunday: thence it is forbidden untill Trinity-sunday, from whence it is unforbidden till Advent-sunday; but then it goes out, and comes not in again till the 12 day of January next following.

The

The beginning and ending of the Terms.

Hillary Term begins January 23, ends February 13.
Easter Term begins April 10, ends May 6.
Trinity Term begins May 24, ends June 12.
Michaelmas Term begins Octob. 23, ends Novemb. 28.

A Table shewing how many years Purchase a Lease or Annuity is worth for any number of years under 30, is worth presently, at interest upon interest, at six in the hundred, and shewing also how to discount any Lease in being, and the true value of the Reversion after any number of years.

Years of a Lease	Years.	Months.	Dec. parts.
1	0	11	4
2	1	9	8
3	2	8	1
4	3	5	7
5	4	2	5
6	4	11	6
7	5	7	10
8	6	2	5
9	6	9	6
10	7	4	3
11	7	10	7
12	8	4	6
13	8	10	3
14	9	3	6
15	9	8	5

The Use and Explanation of this Table.

THe first Column at the left hand sheweth the years of a Lease, or Annuity, and right against each year are the years, months, and decimal parts of a months purchase that such a Lease or Annuity is worth.

Example.

Suppose a Lease or Annuity to continue 18 years, and you would know how many years purchase it is worth in ready mony, look in the Column of the years of a Lease, for 18 years, and against the same you shall find 10, 9, 9, which shews such a Lease to be worth 10 years, 9 months, and 9 ten parts of a months purchase. So that the yearly rent being 12 pound, the value will be thus found.

Years of a Lease	Years.	Months.	Dec. parts.
16	10	1	3
17	10	5	8
18	10	9	9
19	11	1	3
20	11	5	7
21	11	9	3
22	12	0	5
23	12	3	6
24	12	6	6
25	12	9	4
26	13	0	0
27	13	2	5
28	13	4	9
29	13	7	1
30	13	9	2

	lb	s	d
10 times 12 is	120	0	0
12lb in 9 mon. is	9	0	0
in 9 parts is	0	18	0
the value	129	18	0

But if you buy the Reversion of a Lease now, as suppose a Lease of 20 years continuance, and you commence not till 5 years be past, in this and such like cases, look for the present worth of the Lease, as this of 20 years, which will be found worth 11 years, 5 months, 7 tenths of a months purchase, then look the present worth of a Lease of 5 years, which will be found worth 4 years, 2 months, 5 tenths, take this out of 11 5 7 and there remains 7, 3, 2, which are 7 years, 6 months, 2 tenths of a months purchase 3 and so much is the Reversion of the Lease of 20 years, after 5 years worth be expired.

January hath xxxi days.

New moon the 5 day, 5 min. past 3 in the morning.
First quarter the 12 day, 59 min. past 2 in the morning.
Full moon the 20 day, 41 min. past 1 in the morning.
Last quarter the 28 day, 23 min. past 1 in the morning.

Keen Frosts have chained up the streams, and now
A Snowy beard is worn by every bough:
In Silver gray cold Winter cloaths the ground:
And chattering teeth our useless tongues confound.

January 1695.

Uncover as yet roots of Trees where ablaqueation is requisite, Plant Quick-sets, and Transplant Fruit Trees, if not finished. Set Vines, and begin to prune the old, Prune the branches of Orchard fruit Trees, especially the long planted, and that towards the decrease: but for such as are newly planted, they need not be disbranched till the sap begins to stir: In this work cut off all the shoot of *August*, unless the nakedness of the place incline you to spare it:

You may now begin to Nail and Trim your Wall fruit: Cleanse Trees of Mos, &c. the weather moist. Gather Cyons for Graffs before the Buds sprout, and about the latter end Graff them in the stock, Pears, Cherries, and Plums. Set Beans, Pease, &c. In this month forbear Physick, or to let blood, unless necessity constrain; beware of taking cold, for Rheums and Flegm do much increase this month.

1 2 3 Fine mild weather about the begining. 4 5 6 7 8 9 Cold with frost and some 10 11 rain or snow 12 about this 13 time. 14 15 16 17 18 19 Cloudy and 20 cold. 21 22 23 24 25 Some wet may 26 be expected 27 towards the 28 end of the 29 month 30 31

New moon the 3 day, 52 min. past 1 in the afternoon.
First quarter the 10 day, 40 min. past 9 at night.
Full moon the 19 day, 13 min. past 12 at night.
Last quarter the 26 day, 1 min. past 8 in the morning.

February 1695.

In this month remove Graffs of former years Graffing, Cut and lay Quick-sets, Plant Vines as yet, and Hops, and fruit that grows on bunches. Set all sorts of kernels and strong Seeds, also sow beans, Pease Corn-sallet, Marigold, Anny-seeds, Radish; Parsnips, Carrots, Onions, Garlick. Rub Mos off your Trees after a soaking rain, and scrape and cleanse them of Cankers. Cut off the Webs of Caterpillars from the tops of Twigs and Trees to burn. Parsly, Spinage and other hardy Pot herbs may now be planted. Half open your passages for the Bees, but continue to feed weak Stocks.

Be still sparing in Physick, or to let Bloud without necessity, and be carefull not to catch cold when the weather flatters with warmth.

March hath xxxi days.

New moon the 5 day, 21 min. past 1 in the morning.
First quarter 12 day, 3 min. past 5 at night.
Full moon the 20 day, 50 min. past 2 in the afternoon.
Last quarter the 27 day, 46 min. past 1 afternoon.

You may as yet cut Quick-ſets, and cover ſuch Tree-roots as you laid bare in *Autumn*; ſow Oats, Barly, Parſnips, Onions, Carrots, Mellons, Cucumbers, &c. Graff all this month, beginning with Pears, and ending with Apples, unleſs the Spring prove extraordinary forwards. Prune laſt Years Graffs, and Cut off the heads of your budded Stocks. It were profitable now alſo to top your Roſe-Trees a little with your knife near a leaf bud, and to Prune off the dead and withered branches, keeping them lower then the cuſtome is, and to a ſingle Stem.

Slip and Set Sage, Roſemary, Lavender Thyme, &c. Mid-March dreſs up and ſtring your Straw-berry beds. It is now ſeaſonable to purge and let bloud about the 20 of this month, there are ſuch changes in the Air, yet it's generally very ſickly; and therefore be ſpecially carefull of your health at that time.

April hath xxx. days.

New moon the 3 day, 41 min. past 1 afternoon.
First quarter the 11 day, 46 min. past 11 beforenoon.
Full moon the 19 day, 57 min. past 1 in the morn.
Last quarter the 25 day, 11 min. past 7 at night.

Bright *Taurus* now, with Golden horn displays
The joyful year; life in dead plants conveighs:
The quickning spring refreshing showers sheads
Upon the smiling flowers verdant heads.

April 1695.

1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30

Turbulent stormy weather with hasty showers of hail or rain.

Fine seasonable weather and warm about this time.

Black clouds, and very likely thunder with them towards the end of the month.

Now is the time to sow Hemp, and Flax, (Pole Hops,) Sweet Marjoram, Hyssop, Thyme, Winter-savory, Scurvy-grass, Lettice, Purslain, Raddish, &c. Plant Artichoke-slips, and set French Beans, you may slip Lavender, Thyme, Peneroyal, Sage, Rosemary, &c.

Gather up worms and snails in your garden after Evening showers, continue this after all Summer rains. Open your Bee-hives, for now they hatch: Bark Trees for Tanners. The use of Physick is now seasonable, as also Purging and Bloud-letting.

May hath xxxi days.

New moon the 3 day, 59 min past 2 in the morn.
First quarter 11 day, 24 min. past 4 in the morning.
Full moon 18 day, 8 min. past 11 before noon.
Last quarter 25 day, 58 min. past midnight.

Tyndarian Stars being past; days burning eye
Makes *Cancer's* crooked claws in fervour fry:
The Shepherds with their bleeting flocks do go
From scorch't Mountains to cool shades below.

June 1695.

Hot weather now with some showers of rain about this time.

Hot and dry.

Variable weather, as winds, clouds, and storms of rain or hail with thunder about this time.

Sow Lettice, Chervile, Radish, &c. to have young and tender salleting. Gather Herbs in the Full Moon to keep dry; they keep and retain their vertue and sweet smell better, if dryed in the shade, than in the Sun, whatever some pretend. Set Rosemary and Gilliflowers 3 or 4 days after the Full, and they will not run to seed. Look to your Bees for Swarms and Casts, and begin to destroy Insects in your Garden with Hoofs, Canes, and tempting Baits; gather snails after Rain, &c.

Thin and light Diet, and chast thoughts tend to health: Lie not unadvisedly on the ground, nor over hastily drink.

July hath xxxi days.

New moon the 1 day, 41 min. past 7 in the morning.
First quarter the 9 day, 20 min. past 8 in the morn.
Full moon the 16 day, 10 min. past 1 in the morn.
Last quarter the 22 day, 42 min. past 8 at night.
New moon the 30 day, 52 min. past 10 at night.

In this month, fallow your Land for Wheat, pull up Hemp that is ripe, get Rue and Wormwood to drive away Fleas and Moths; dry Flowers in the shade and then Sun them a little for fear of corruption; perfume your house with sweet savours, and defend your self from stinks in the street.

Forbear superfluous drinking, but eat heartily; use cold Herbs and Meat, abstain from Physick. Perfume your house every morning with Tar, use Carduus Benedictus boiled, and drink fasting.

August hath xxxi days.

The wrinkled brow, the furrowed face appear,
And hoary head of the departing year:
The people ſhed no tears nor mournful cries,
But with glad feaſts conclude it's obſequies.

In this month and alſo in the next fell great Timber in the decreaſe of the moon, for then it being driеſt will laſt the longer; uncover the roots of your fruit-trees, you may now plant Vines, alſo ſtocks for graffing, ſet all ſorts of Kernels, Stones, &c. All this month you may continue to trench and dung ground, to be ready for the Planting of Fruit-Trees, &c. Either late in this month, or in *January* Prune and Cut off your Vine ſhoots to the very Root.

Let the Kitchen be thy Apothecaries ſhop, hot meats and broths thy Phyſick.

A Regal Table in a more exact manner

The Year, Month, and Day, (accounting the Year to begin Jan. 1.) whereon every King and Queen of Eng. since the Conquest began their reign.			The number of Years Months, and Days, that every K. and Q. reigned to reign: 28 da. to a month.						The num. of Y. expired in this Y. since they began to reign: as also since they ended.		
K. W. Conq.	1066	Octob. 14	20	y	11	m	22	d	629

The Use of the Table in Example.

King *Henry* 8 began his Reign in the Year of *Christ* 1509, *April* 22 He Reigned 37 Years, 10 months, and 2 days It is since he began his Reign 186 years compleat the 22 of *April* this year 1695. Now to know the time since the end of his Reign, before his name standing on the right hand, you shall there find 148 Years since he died, *Jan.* 28. And so of the rest.

M. DC. XCV.

The latter part of this ALMANACK

For the Year of our

LORD GOD

1695.

Being the 3d after Biſſextile or Leap-year, and from the Conqueſt of *England* by *William* Duke of *Normandy* 629 Years.

Wherein is contained the Eclipſes, with a plain and eaſie table for intereſt. Likewiſe Rules for meaſuring of Land, with ſeveral Examples, as alſo an account of things good for ſeveral parts of the body, and of bloud letting, with other uſefull things, and the Fairs in a larger manner than formerly.

Frigidus & ſiccus Satur. Jup. *æſtuat udus.*
Mars & Sol *ſicco fervent: ſed,* Luna Venuſque
Udæ frigeſcunt: medius Cylenus *eſto.*

CAMBRIDGE,
Printed by *John Hayes* Printer to the *Univerſity.* 1695.

The Anatomy of Man's Body.

The Names and Characters of the twelve Signs

♈ Aries Head and Face	♎ Libra Reins and Loyns
♉ Taurus Neck and Throat	♏ Scorpio Secret Members
♊ Gemini Arms and Should.	♐ Sagitarius the Thighs
♋ Cancer Breast and Stomach	♑ Capricornus the Knees
♌ Leo Heart and Back	♒ Aquarius the Legs
♍ Virgo Bowels and Belly	♓ Pisces the Feet.

The Characters, Names and Natures of the 7 Planets.

♄ Saturn Cold and dry	♀ Venus Cold and moist
♃ Jupiter Hot and moist	☿ Mercury Variable
♂ Mars Hot and dry	☾ Luna Cold and moist.
☉ Sol Hot and dry	

The

This year 1695 will happen four Eclipses, two of the Sun, and two of the Moon.

THE first will be of the Moon, the 18 day of *May* about ten of the Clock in the forenoon, and therefore inconspicuous to us in *England*.

The second will be of the Sun on *June* the first, about 5 of the Clock at night in 21 degrees of *Gemini*: it bodes Mortality, &c.

The third is of the Moon, on the 10 of *November* about 8 of the Clock at night among the Stars of the *Pleiades*; and if the Air be clear, one third of the Moons body may be seen to lose its light.

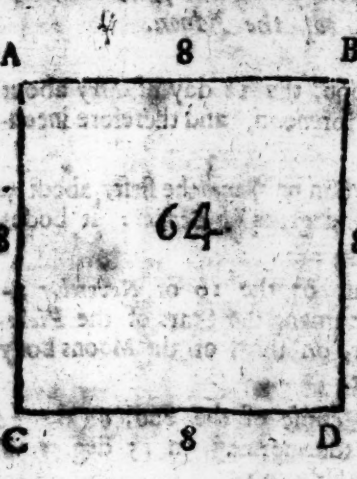
The last will be a small Eclipse of the Sun, on the 26 of *November* about seven in the morning, in 15 degrees of the Celestial Archer; not visible to us.

There will happen a famous opposition of ♄ and ♂ in 8 degrees of ♋ and ♈, on *August* the 12 the effects thereof I will leave to time to tell.

How to Measure Land.

FIrst, If Land be just Square like unto the following figure A B C D, then multiply the side in it self, and the Product is the superficial capacity. Example, suppose the square A B C D be

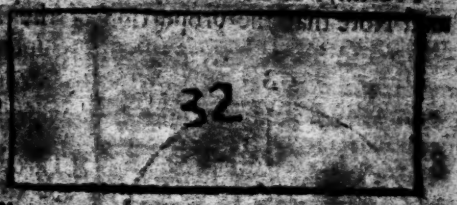
be a piece of Land, and the side thereof contain 8 Perches, therefore Multiply 8 into it self, and the Product is 64; and so many Perches doth that square Piece of Land contain. But if you cannot Multiply, you may account by your memory, saying 8 times 8, which you shall find to make 64, as aforesaid; that is 0 Acr. 1 Rood, and 24 Perches: for 40 Perches make a Rood, 80 half an Acre, 120 Three Roods, and 160 an Acre.



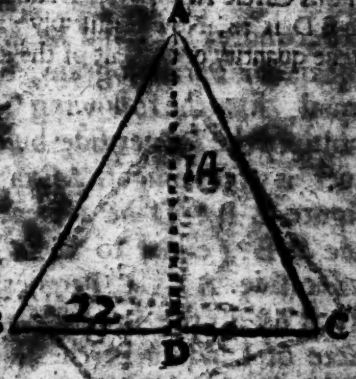
Secondly, If Land lie in the Form of a long Square or Parallelogram, having the opposite sides equal, like the following Figure A B C D, then multiply the longer side by the shorter and the Product is the content. Example, suppose the next Figure A B C D be a piece of Land whose longer side A B (equal to C D) is 8 Perches and the lesser side A C 4 Perches, Now if you Multiply 8 by 4, the Product 32 is the content of this piece of Land in Perches: After this manner may all kind of Lands in the open fields be measured, for though the one end be broader then the other

yet

yet the breadth being taken at the ends, you must add them together and take the half thereof. Example, suppose the length of a Land taken in the field be 44 Perches, the breadth at one end 4, and the breadth at the other end 3 Perches, their Summ 8, the half thereof 4, is the true breadth, then say 4 times 44 is 176, and that is 1 Acre and 16 Perches for the content of that Land.

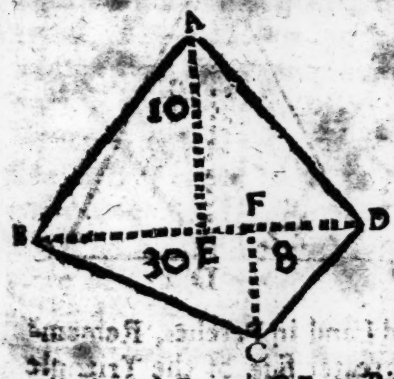


Thirdly, If Land lie in the shape of a Triangle like this Figure, you are to Multiply the Perpendicular by half the Base, and the Product sheweth the content. Example, In this Figure the Base BC is 22 Perches, and the Perpendicular AD 14, which I multiply by the half Base 11, and the Product 154 is the content of the said Land in Perches, Remember that we call the greater side of the Triangle



the Base, whereon the Perpendicular (coming from the opposite Angle) must fall square-wise, that is making right Angles therewith.

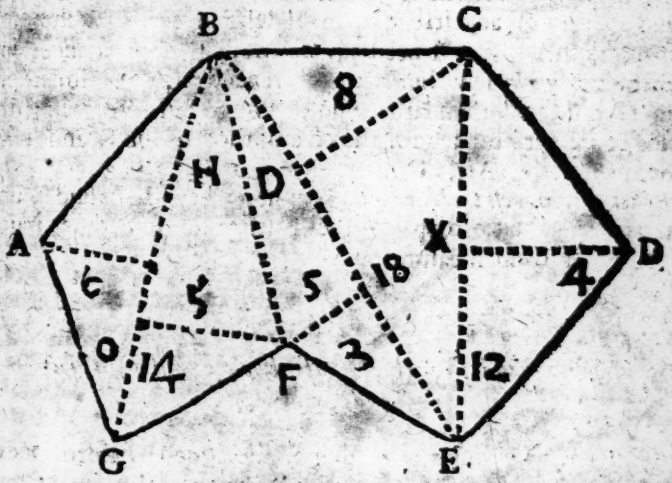
Fourthly, If Land be just in the form of a Circle, you must Note that the proportion of the Diameter to the Circumference is as 7 to 22, therefore the Diameter being known, you may conclude the Compass to be Three times so much, and one Seventh part more. As in this Circle AB CD, the Diameter B D is 14, and therefore the Compass is 44. To measure this piece of Land, Multiply half the Circumference by half the Diameter, and the product is the content. Example, In this Circle ABCD, the Diameter or greatest breadth thereof B D is 14, Now I Multiply 22 by 7, and the Product 154 is the quantity or content of the said piece of Land.



Fifthly, When Land lies in the fashion of this Figure A B C D, which is called a Trapezie; then Multiply the Sum of the Two Perpendiculars, by half the Base, and you shall have the superficial capacity thereof. Example, First I draw the Diagonal-Line B D, and thereon let fall the Perpendiculars A E and C F at Right Angles upon the Base B D,

B D, then I measure A E, and find it 10 Perches, and C F 8, their Summs are 18, which I Multiply by half the Base B D 15. and the Product is 270 Perches; that is 1 Acre, 2 Roods, and 30 Perches for the content of the piece of Land A B C D.

Sixthly, But if Land lie irregular, and be full of Nooks and Corners, then the best way will be to divide it into Trapezies and Triangles upon the Ground, which may be done by setting up little Sticks in a straight Line between corner and corner; as in this irregular Figure noted with the Letters A B C D E F G, where I draw Lines from one Angle to another, B G, B F, B E, C E, and so is the Figure reduced into the Trapezies A B G F, B F E C, and into the Triangle C D E. Then cast up the content of 2 Trapezies, and the Triangle as before is shewed, and their Sum is the content of this irregular Figure.



Example, In the Trapezie A B F G, the Summs of the Perpendiculars A H and F O are 11, and the half of the

Baſe BG 7, which Multiplied together, make 77 for the content of the Trapezie ABFG. Again, in the Trapezie BCEF, the Sums of the Perpendiculars FS and CD are 11, and half the Baſe BE is 9, which Multiplied together make 99 for the content of that Trapezie. Thirdly, In the Triangle CDE, the half Baſe CE 6, Multiplied by DX 4, the Perpendicular maketh 24, the content of the Triangle CDE. Laſtly, Add together the 2 Trapezies and the Triangle, and the Sum is the content of the whole irregular Figure ABCDEFG.

Example, { Trapezies { ABFG 77. / BCEF 99. } Sum 200. / Triangle CDE 24. }

Theſe Three Numbers being added together, make 200 Perches, which is 1 Acre and 1 Rood; and ſo much doth this irregular Figure contain. After this manner may any ordinary Artificer or Tradeſman caſt up the true content and quality of any irregular Field whatſoever; which being ſo plain and facile, I need ſay no more thereof, conceiving there are very few but will apprehend it. As for thoſe that would underſtand the whole Art of Surveying and deſire to be furniſhed with the Geometrical grounds and Theorems of the Art, I refer them to Mr. *Wing*'s *Geodætes Practicus*, or *Art of Surveying*, where they ſhall find much ſatisfaction, according to their deſires. And thus much briefly of Land Meaſure.

Meats good for the whole body, and of a ſanguine juyce.

GRrapes, Raiſins, and Figs, be good before meat, Morning Milk drunk faſting, Pullets, Pigeons, Capenets, Veal ſucking, Young Pork, Beef not above 3 years old, Rice with Almond milk, Birds of the field, green

Geeſe,

Geese, Hen-Eggs new potched, nor *hard*, *Pheasants*, *Partridges*, and *Fishes* of *Stony Rivers*.

Meat good to temper Choller, and to asswage heat with moistness.

New Cheese, Rapes, Lambs, Cowcumbers, all great Fish, Lungs, Brains, inward parts of beasts, and meats full of sinewes.

How the Vertues be corroborated.

The Vertues be either Vital, Animal, or Natural; the Vital Vertues remain in the heart, the Animal in the brain, and the Natural in the Liver: the Vital virtues are governed by *Sol* and *Jupiter*, the Animal of *Luna*, *Mercury*, and *Venus*; and the Natural of *Jove* and *Venus*.

Other Vertues be also governed of the Planets, as the vertue Attractive is governed of *Sol*, the Digestive of *Jove*, the Retentive of *Saturn*, and the Expulsive of *Luna*.

Also the Signs thus govern the vertues, *Aries* and *Sagitarius* rule the Attractive, *Gemini* and *Libra* the Digestive, *Taurus* and *Virgo* the Retentive, and *Cancer* and *Pisces* the Expulsive.

Also the Vertues be ruled by the Planets thus: *Sol* the well-Spring of the vertues Vital, *Luna* of the vertues Animal, *Saturn* of the Receptive, *Jupiter* of the Augmentative, and *Mercury* of the Imaginative: Therefore when you would fortifie any of these Vertues, fortifie the Planet signifying the same and it is done.

Rules for drawing of bloud.

In letting of bloud you must know what persons are fit to bleed, and what not; and if they be fit, how it is with the person inwardly, for his complection and Age,

and outwardly for the time of the year, time of the month, day and diet.

For Complection.

For the Phlegmatick let the Moon be in *Aries* or *Sagittarius* when ye draw bloud. For the Melancholly in *Libra* or *Aquarius*. For the Cholerick in *Cancer* or *Pisces*. And for the Sanguine in any of the aforesaid: *Luna signum membrum dominans peragrante.*

For Age, Let bloud

In Youth from the change to the first Quarter. In middle age from the first quarter to the full. In elder age, from the full to the last quarter. In old age from the last quarter to the change.

For the time of the year.

The Spring is best, harvest indifferent, the rest of the year bad, and to be used but upon necessity.

For the time of the Month.

Let not bloud 3 days before or after the change, the day before and after the Conjunction of *Luna* and *Saturn*, the like of the Conjunction of *Luna* and *Mars*; Let not bloud, *Venus* and *Luna* in Conjunction, while *Venus* is combust, Let not bloud the day before and after the full Moon: the like observe, the Moon in Conjunction with *Saturn* or *Mars* The Moon in any Aspect with *Jupiter* or *Venus*, or in a Sextile or Trine with *Sol* or *Mars* produce a fit time to let bloud: *this to the skilful may be of use.*

The

The time of the day.

The morning fasting is best, or in the evening after perfect digestion, provided the Air be temperate and the wind not South: Persons that are not fit to bleed be such as are under the age of 14 years, or more then 59 years old, or, those that are exceeding fat, or very lean. And after bleeding use no violent exercise, no Sleeping, Venery, or Gluttony.

Things good for many parts, and first for the head.

Galingal, Marjoram, Rosemary, Roses, Hysop, Camomil, Rue and Frankinscence.

For the Heart, Cinnamon, Saffron, Cloves, Mace, Buglos, Burrage, Setnal, Rosemary, Marjoram, Musk and Nutmeggs.

For the Stomach, Quinces, Nutmeggs, Saffron, Wormwood, Coral, Mint, Cloves and Coriander prepared.

For the Eyes, Fennel, Verven, Cloves, cold water, Celendine, Eye-bright.

For the Liver, Lettice, Liverwort, Violets, Rosewater, Plantan, Fennel and Cloves.

For the Lungs, Licorish, Raisins, Almonds, Dates, Lungwort and Pennidice.

Meats hurtfull for the Teeth.

Nuts, Meats very hot, warm drink, sweet meats and drinks, Radish roots, hard meats, bitter meats, milk, much vomiting, Leeks, fat of Fish, and Coleworts.

Things hurtful to the Eyes.

Garlick, Onions, Radish, Drunkenness, sweet and thick wines, salt meats, Coleworts, all Pulse, Dust, fire, and reading presently after Supper.
